

## Praktikum 2

### PBO

Nama : Billy Achmad Bachrudin

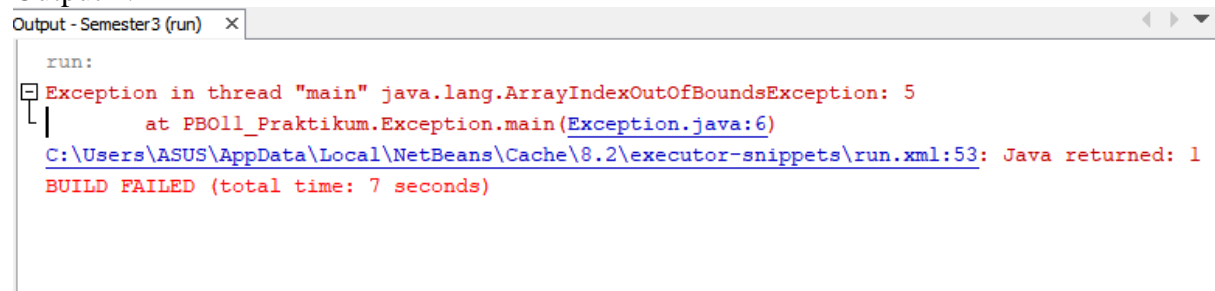

NIM : 20210040100

Kelas : TI21F

### Percobaan 1

```
public class Exception {  
  
    public static void main(String[] args) {  
        int a[]=new int[5];  
        try  
        {  
            a[5]=100;  
        }  
        catch(Exception e)  
        {  
            System.out.println("Terjadi pelanggaran memory");  
        }  
    }  
}
```

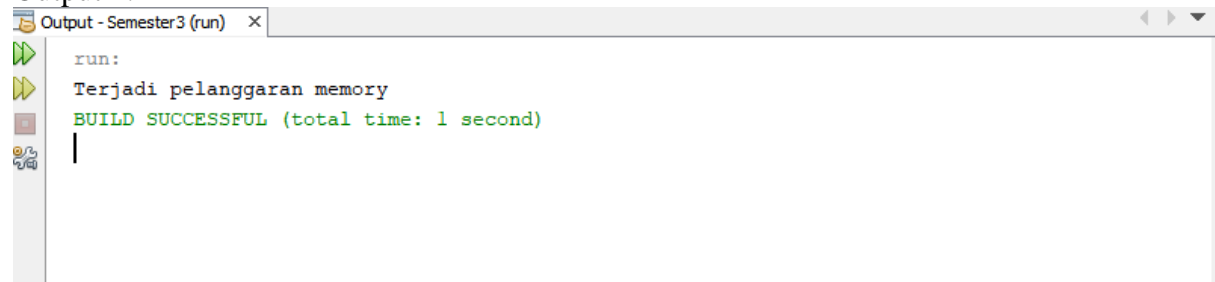

#### Output 1:

The screenshot shows an IDE output window titled "Output - Semester3 (run)". The output text is as follows:

```
run:  
Exception in thread "main" java.lang.ArrayIndexOutOfBoundsException: 5  
    at PBO11_Praktikum.Exception.main(Exception.java:6)  
C:\Users\ASUS\AppData\Local\NetBeans\Cache\8.2\executor-snippets\run.xml:53: Java returned: 1  
BUILD FAILED (total time: 7 seconds)
```

#### Output 2:

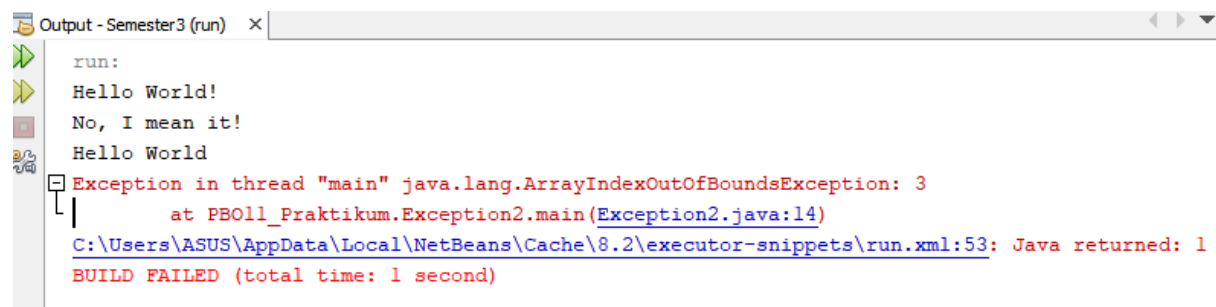

The screenshot shows an IDE output window titled "Output - Semester3 (run)". The output text is as follows:

```
run:  
Terjadi pelanggaran memory  
BUILD SUCCESSFUL (total time: 1 second)
```

## Percobaan 2

```
public class Exception2 {
    public static void main(String[] args) {
        int i=0;
        String greetings[]={
            "Hello World!",
            "No,I mean it!",
            "HELLO WORLD!"
        };
        while(i<4)
        {
            try
            {
                System.out.println(greetings[i]);
                i++;
            }
            catch (ArrayIndexOutOfBoundsException e)
            {
                System.out.println("Resetting index value");
                i=0;
            }
        }
    }
}
```

Output 1:

```
run:
Hello World!
No, I mean it!
Hello World
Exception in thread "main" java.lang.ArrayIndexOutOfBoundsException: 3
    at PB011_Praktikum.Exception2.main(Exception2.java:14)
C:\Users\ASUS\AppData\Local\NetBeans\Cache\8.2\executor-snippets\run.xml:53: Java returned: 1
BUILD FAILED (total time: 1 second)
```

Hal ini terjadi karena nilai i akan menjadi = 0 ketika terjadi error `IndexOutOfBoundsException`.

Bila nilai i menjadi  $\geq 4$  maka akan menghasilkan output:

Output 2:

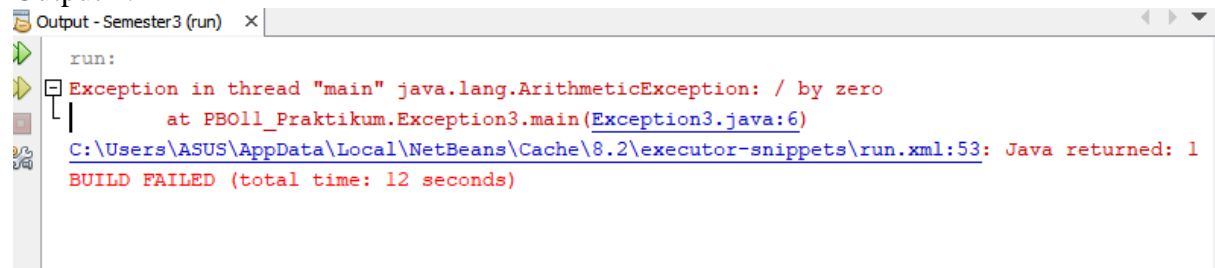

```
run:
Hello World!
No,I mean it!
HELLO WORLD!
Resetting index value
```

### Percobaan 3

```
public class Exception3 {  
  
    public static void main(String[] args) {  
        int bil=10;  
        try  
        {  
            System.out.println(bil/0);  
        }  
        catch(Exception e)  
        {  
            System.out.println("Ini menghandle error yang terjadi");  
        }  
    }  
}
```

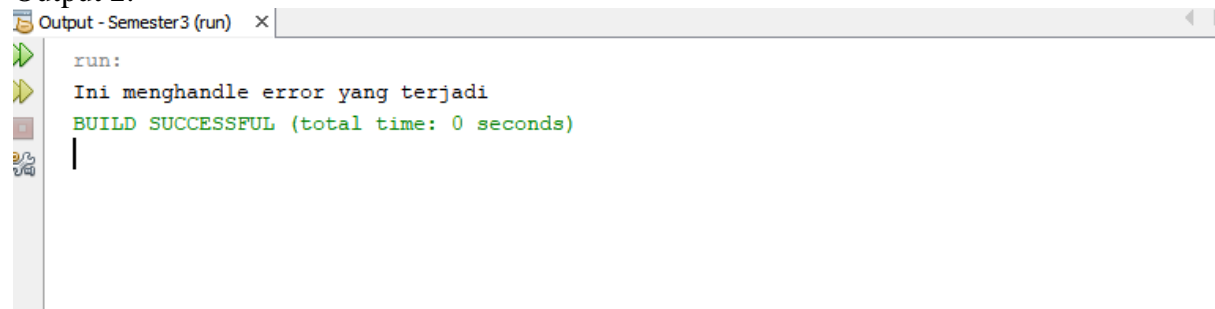

#### Output 1:

Output - Semester3 (run) x

```
run:  
Exception in thread "main" java.lang.ArithmeticException: / by zero  
    at PBO11_Praktikum.Exception3.main(Exception3.java:6)  
C:\Users\ASUS\AppData\Local\NetBeans\Cache\8.2\executor-snippets\run.xml:53: Java returned: 1  
BUILD FAILED (total time: 12 seconds)
```

#### Output 2:

Output - Semester3 (run) x

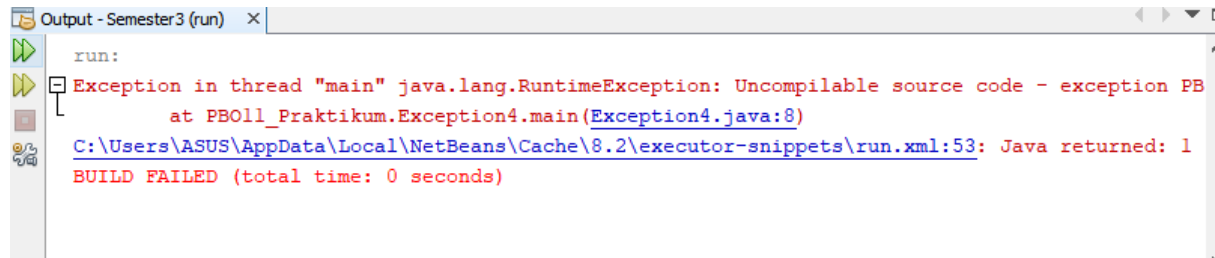

```
run:  
Ini menghandle error yang terjadi  
BUILD SUCCESSFUL (total time: 0 seconds)
```

## Percobaan 4

```
public class CobaException4 {  
    public static void main(String[] args) {  
        int bil=10;  
        String b[]={ "a", "b", "c"};  
        try  
        {  
            System.out.println(bil/0);
```

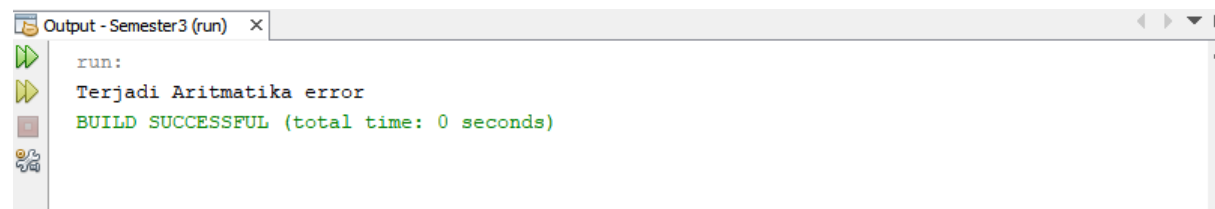

```
            System.out.println(b[3]);  
        }  
        catch(ArithmeticException e)  
        {  
            System.out.println("Terjadi Aritmatika error");  
        }  
        catch(ArrayIndexOutOfBoundsException e)  
        {  
            System.out.println("Melebihi jumlah array");  
        }  
        catch(Exception e)  
        {  
            System.out.println("Ini menghandle error yang terjadi");  
        }  
    }  
}
```

### Output 1:

The screenshot shows an IDE output window titled "Output - Semester3 (run)". It displays a red error message: "Exception in thread 'main' java.lang.RuntimeException: Uncompilable source code - exception PB at PB011\_Praktikum.Exception4.main(Exception4.java:8)". Below the error message, it shows the file path "C:\Users\ASUS\AppData\Local\NetBeans\Cache\8.2\executor-snippets\run.xml:53: Java returned: 1" and the status "BUILD FAILED (total time: 0 seconds)".

### Output 2:

The screenshot shows the same IDE output window after a successful run. It displays the text "run:" followed by "Terjadi Aritmatika error" and "BUILD SUCCESSFUL (total time: 0 seconds)".

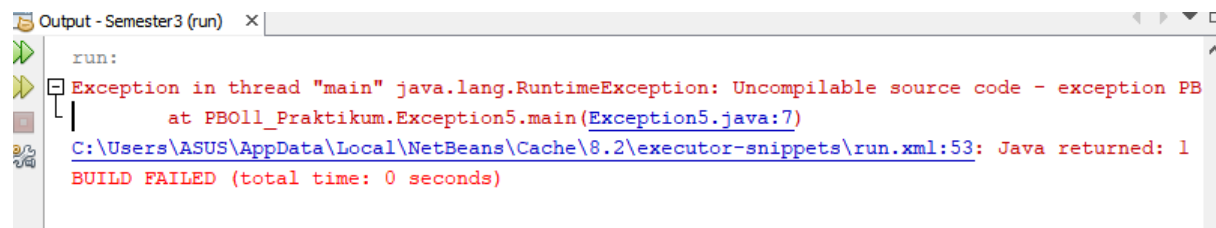

## Percobaan 5

```
public class Exception5 {  
  
    public static void main(String[] args) {  
        int bil=10;  
        try  
        {  
            System.out.println(bil/0);  
        }  
        catch(ArithmeticException e)  
        {  
            System.out.println("Pesan error: ");  
            System.out.println(e.getMessage());  
            System.out.println("Info stack erase");  
            e.printStackTrace();  
            e.printStackTrace(System.out);  
        }  
        catch(Exception e)  
        {  
            System.out.println("Ini menghandle error yang terjadi");  
        }  
    }  
}
```

### Analisis :

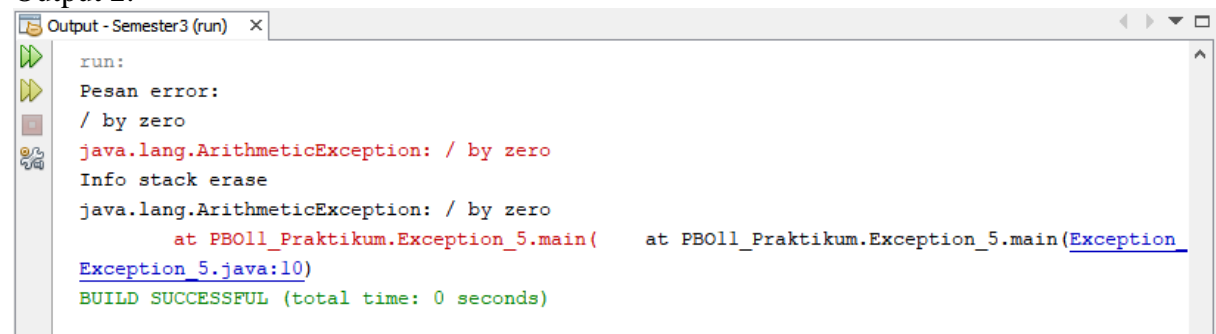

Ketika variabel bil yang bernilai 10 dibagi dengan 0 pada try, akan terdeteksi error yaitu ArithmeticException. Selanjutnya program akan menampilkan output yang ada di dalam catch AritmeticException.

### Output 1:

The screenshot shows an IDE output window titled "Output - Semester3 (run)". It displays a red error message: "Exception in thread "main" java.lang.RuntimeException: Uncompilable source code - exception PB at PB011\_Praktikum.Exception5.main(Exception5.java:7)". Below this, it shows the file path "C:\Users\ASUS\AppData\Local\NetBeans\Cache\8.2\executor-snippets\run.xml:53: Java returned: 1" and the status "BUILD FAILED (total time: 0 seconds)".

### Output 2:

The screenshot shows the same IDE output window after successful execution. It displays the following output: "run:", "Pesan error:", "/ by zero", "java.lang.ArithmeticException: / by zero", "Info stack erase", "java.lang.ArithmeticException: / by zero", "at PB011\_Praktikum.Exception\_5.main( at PB011\_Praktikum.Exception\_5.main(Exception\_5.java:10)", and "BUILD SUCCESSFUL (total time: 0 seconds)".

## Percobaan 6

```
public class ThrowExample {

    static void demo()
    {
        NullPointerException t;
        t=new NullPointerException("Coba Throw");
        throw t;

        // Baris ini tidak lagi dikerjakan;
        System.out.println("Ini tidak lagi dicetak");
    }

    public static void main(String[] args) {
        try
        {
            demo();
            System.out.println("Selesai");
        }
        catch (NullPointerException e)
        {
            System.out.println("Ada pesan error: "+e);
        }
    }
}
```

### Analisis :

Fungsi demo() memiliki kesalahan yang dibuat manual yaitu NullPointerException, ketika pada blok try NullPointerException akan dilemparkan dan ditangkap oleh bertipe NullPointerException.

### Output :

```
run:
Ada pesan error: java.lang.NullPointerException: Coba Throw
BUILD SUCCESSFUL (total time: 0 seconds)
```

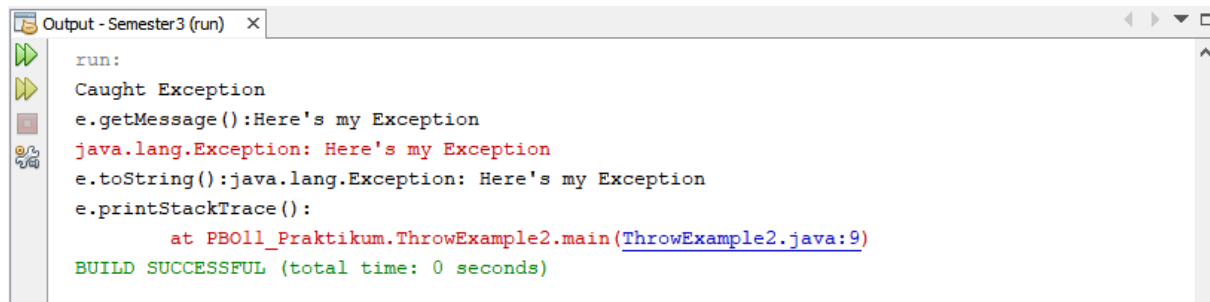

## Percobaan 7

```
public class ThrowExample2 {  
  
    public static void main(String[] args) {  
        try  
        {  
            throw new Exception("Here's my Exception");  
        }  
        catch(Exception e)  
        {  
            System.out.println("Caught Exception");  
            System.out.println("e.getMessage():"+e.getMessage());  
            System.out.println("e.toString():"+e.toString());  
            System.out.println("e.printStackTrace()");  
            e.printStackTrace();  
        }  
    }  
}
```

### Analisa :

Pada blok try akan dilemparkan Exception manual dan ditangkap pada catch

### Output :

```
run:  
Caught Exception  
e.getMessage():Here's my Exception  
java.lang.Exception: Here's my Exception  
e.toString():java.lang.Exception: Here's my Exception  
e.printStackTrace():  
    at PBO11_Praktikum.ThrowExample2.main(ThrowExample2.java:9)  
BUILD SUCCESSFUL (total time: 0 seconds)
```

## Percobaan 8

```
import java.io.*;

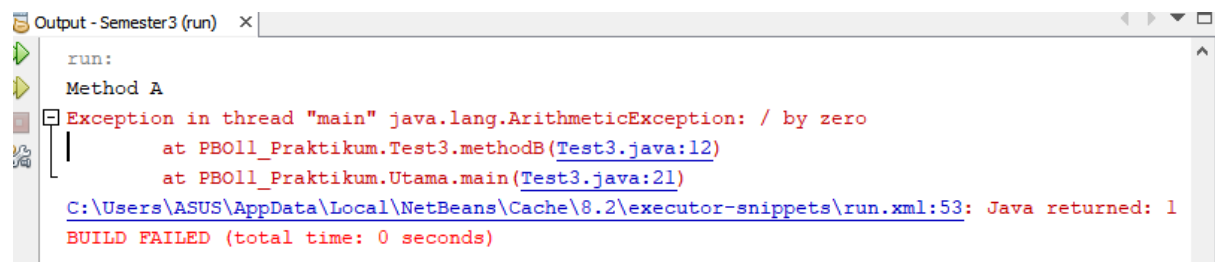

public class Test3 {
    public void methodA() {
        System.out.println("Method A");
    }
    public void methodB() throws IOException
    {
        System.out.println(20/0);
        System.out.println("Method B");
    }
}
```

```
class Utama
{
    public static void main(String[] args)
    {
        Test3 o=new Test3();
        o.methodA();
        try
        {
            o.methodB();
        }
        catch(Exception e)
        {
            System.out.println("Error di Method B");
        }
        finally
        {
            System.out.println("Ini selalu dicetak");
        }
    }
}
```

### Analisis :

Pada program di atas dibuat objek o dari kelas Test3. Kemudian dipanggil methodA yang ada di objek o. Lalu pada try dipanggil methodB yang ada di objek o, akan tetapi terdapat error “20/0”. Karena terdeteksi error kemudian program akan dilanjutkan ke catch Exception yang menampilkan output “Error di Method B”. Setelah itu program akan menampilkan output “Ini selalu dicetak” yang dimana akan selalu dibaca walau tidak terdapat error.

### Output :

```
Output - Semester3 (run) x
run:
Method A
Exception in thread "main" java.lang.ArithmeticException: / by zero
    at PB011_Praktikum.Test3.methodB(Test3.java:12)
    at PB011_Praktikum.Utama.main(Test3.java:21)
C:\Users\ASUS\AppData\Local\NetBeans\Cache\8.2\executor-snippets\run.xml:53: Java returned: 1
BUILD FAILED (total time: 0 seconds)
```

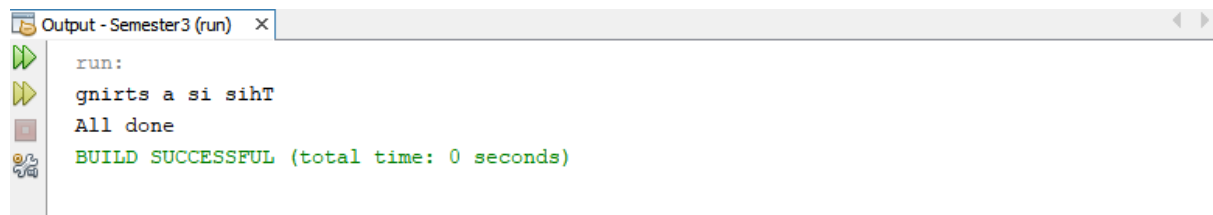

## Percobaan 9

```
class Propagate {  
    public static void main(String[] args)  
    {  
        try  
        {  
            System.out.println(reverse("This is a string"));  
        }  
        catch(Exception e)  
        {  
            System.out.println("The String was blank");  
        }  
        finally  
        {  
            System.out.println("All done");  
        }  
    }  
  
    public static String reverse(String s) throws Exception  
    {  
        if(s.length()==0)
```

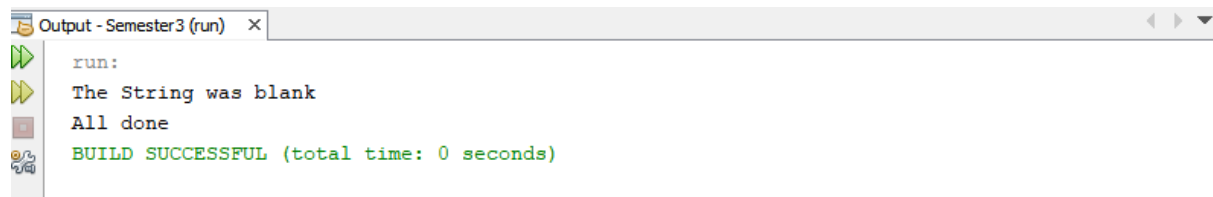

```
{  
            throw new Exception();  
        }  
        String reverseStr = "";  
        for(int i=s.length()-1 ; i>=0 ; --i){  
            reverseStr+=s.charAt(i);  
        }  
        return reverseStr;  
    }  
}
```

### Output :

```
Output - Semester3 (run) x  
run:  
gnirts a si sihT  
All done  
BUILD SUCCESSFUL (total time: 0 seconds)
```

Pada saat fungsi reverse dikosongkan menjadi reverse("") terdeteksi error sehingga program akan menampilkan output yang terdapat di catch sehingga akan menampilkan output sebagai berikut :

```
Output - Semester3 (run) x  
run:  
The String was blank  
All done  
BUILD SUCCESSFUL (total time: 0 seconds)
```

## Percobaan 10

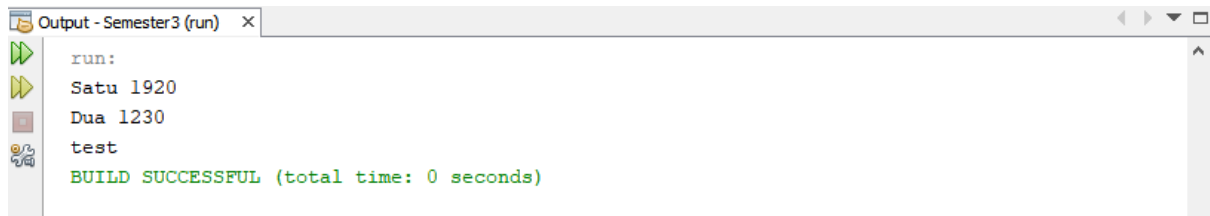

```
class RandomAccessRevisi
{
    public static void main(String[] args) {

        String bookList[]={"Satu","Dua","Tiga"};
        int yearList[]={1920,1230,1940};
        try
        {
            RandomAccessFile books = new RandomAccessFile
("books.txt","rw");

            for(int i=0;i<3;i++)
            {
                books.writeUTF(bookList[i]);
                books.writeInt(yearList[i]);
            }
            books.seek(0);
            System.out.println(books.readUTF()+" "+books.readInt());
            System.out.println(books.readUTF()+ " "+books.readInt());
            books.close();

        }
        catch(IOException e)
        {
            System.out.println("Indeks melebihi batas");
        }
        System.out.println("test");
    }
}
```

## Output :

```
run:
Satu 1920
Dua 1230
test
BUILD SUCCESSFUL (total time: 0 seconds)
```

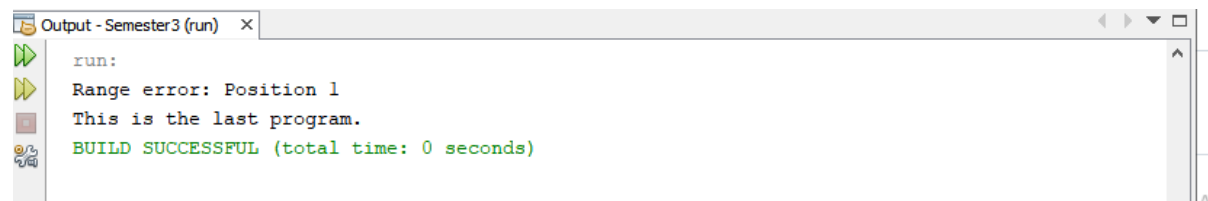

Muncul file tipe txt dengan nama books.

## Percobaan 11

```
class RangeErrorException extends Throwable
{
    public RangeErrorException(String s)
    {
        super(s);
    }
}
```

```
public static void main(String[] args)
{
    int position=1;
    try
    {
        if(position>0)
        {
            throw new RangeErrorException("Position " +position);
        }
    }
    catch(RangeErrorException e)
    {
        System.out.println("Range error: " +e.getMessage());
    }
    System.out.println("This is the last program.");
}
```

## Output :

The screenshot shows an IDE output window titled "Output - Semester3 (run)". It contains the following text: "run:", "Range error: Position 1", "This is the last program.", and "BUILD SUCCESSFUL (total time: 0 seconds)". The output is displayed in a monospaced font, with the success message in green. The window has a standard toolbar with icons for run, stop, and other IDE functions.

```
run:
Range error: Position 1
This is the last program.
BUILD SUCCESSFUL (total time: 0 seconds)
```

## Percobaan 12

```
class MyException extends Exception{
    private String Teks;
    MyException(String s)
    {
        Teks="Exception generated by: "+s;
        System.out.println(Teks);
    }
}

class Eksepsi
{
    static void tampil(String s)throws Exception
    {
        System.out.println("Tampil");
        if(s.equals("amir"))
        {
            throw new MyException(s);
        }
        System.out.println("OK!");
    }

    public static void main(String[] args)throws Exception
    {
        try
        {
            tampil("ali");
            tampil("amir");
        }
        catch(MyException ex)
        {
            System.out.println("Tangkap:"+ex);
        }
    }
}
```

## Output :
